**MANAGEMENT DISCUSSION AND ANALYSIS REPORT**

Sponge Iron is Iron Ore reduced directly in solid state using coal gas, natural gas or coal reductants and is also known as Directly Reduced Iron (DRI). Basically, Sponge Iron is a substitute for steel scrap and therefore the price of Sponge Iron varies from time to time in view of the availability of the steel scrap in the country.

Company's plant is one of the initial coal-based Sponge Iron plant in India with the Technical knowhow from Lurgi Chemie Metallurgie Industriebau GmbH, Germany. Major equipment both imported and indigenous has been used as per LURGI's proprietary design. The technology being new at that point of time the cost of project was high. In today's scenario, the cost of project of similar capacity would be much lower.

The continuous increase in raw material prices and its irregular supply has resulted into increase in total cost of production and consequently increased losses. During the year Company procured raw material from open market.

In the recent years smaller indigenous Sponge Iron plants involving less capital cost have been set up right near the iron ore mines. These smaller plants are giving tough competition in the market. At the same time it has started affecting the supply and price of Iron Ore. During the last about three to four years the prices of Iron Ore and coal has been increased many fold. Besides, since 1-1-2008 as per the new Coal Distribution Policy of the Govt., only 75% of the coal linkage through Fuel Supply Agreement at notified price is available. The balance 25% requirement of coal has to be sourced through e-auction, rates for which are quiet exorbitant and thus increasing the cost of production. Southern Coal Fields Ltd (SECL) is not making the supply of coal under Fuel Supply Agreement and the matter is pending before Supreme Court. This has further shaken the business economics and profitability of the Company.

At present the availability of right quality of iron ore at the right price is a big problem. The cost of iron ore is prohibitive as a result of which the selling price of Sponge iron is not lucrative. In the current scenario, for a sponge iron plant, it is very difficult to make profits without having own captive iron ore mines. The Company is putting in its best efforts to acquire an iron ore mine to ensure the smooth and profitable operations of the Company.

During the year due to maintenance, non availability of raw material, plant remained closed for about five months and there was no production. The operations can be made profitable by having own captive mines and then installation of power plant utilizing waste heat of the Kiln, expansion of production capacity; installation of furnace and manufacturing items of steel.

**CERTIFICATE**

**To The Members of  
Nova Iron & Steel Ltd.**

We have examined the compliance of conditions of Corporate Governance by Nova Iron & Steel Ltd. ('the Company') for the period ended on 31<sup>ST</sup> March , 2012, as stipulated in Clause 49 of the Listing Agreement of the said Company with Stock Exchanges. **NOTE 1 : SIGNIFICANT ACCOUNTING POLICIES**

**(I) BASIS OF PREPARATION OF FINANCIAL STATEMENTS**

**(a) Basis of Accounting:**

The financial statements have been prepared in accordance with Generally Accepted Accounting Principles (GAAP) in India and presented under the historical cost convention on accrual basis of accounting to comply with the accounting standards prescribed in the Companies (Accounting Standards) Rules, 2006 and with the relevant provisions of the Companies Act, 1956.

**(b) Use of Estimates:**

The preparation of financial statements in conformity with Generally Accepted Accounting Principles (GAAP) in India requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosures of contingent liabilities on the date of financial statements and reported amounts of income and expenses during the period. Difference between the actual result and estimates are recognized in the period in which the results are known/ materialized.

**(c) Presentation and disclosures in financial statements:**

For the period ended 31st March, 2012, the revised Schedule VI notified under the Companies Act, 1956, has become applicable to the Company, for presentation and disclosures in the financial statements. The Company has reclassified the previous year's figures in accordance with the revised Schedule VI as applicable in the current period.

**(II) FIXED ASSETS**

**(a) Tangible Fixed Assets**

Fixed Assets are stated at cost, net of VAT/ MODVAT/ CENVAT, less accumulated depreciation. The costs comprises purchase price, borrowing costs relating to qualifying assets till commencement of commercial production and directly attributable cost of bringing the assets to its working condition for the intended use. Any trade discounts and rebates are deducted in arriving at the purchase price.

Subsequent expenditure related to an item of fixed asset is added to its book value only if it increases the future benefits from the existing assets beyond its previously assessed standard of performance.

Machinery spares that can be used only in connection with an item of fixed asset and their use is expected to be irregular are capitalized. Replacement of such spares is charged to revenue. Capital expenditure on assets not owned by the company with exclusive right to use is reflected in capital work in progress till the period of completion and thereafter in fixed assets.

**(b) Assets in the Course of construction**

Assets in the Course of construction are reflected in capital work in progress. At the point when an asset is operating at management's intended use, the cost of construction is transferred to appropriate category of fixed assets. Costs associated with the commissioning of an asset are capitalized where the asset is available for use but incapable of operating at normal levels until a period of commissioning has been completed.

**(III) MISCELLANEOUS EXPENDITURE**

Public issue and deferred revenue expenditure are being written off over a period of ten years. Preliminary expenses have been written off during the year. This amounts to Change in Accounting Policy than the earlier one, when it was being written off over a period of Ten years. Due to this Change the loss for the reporting period is more by ₹ 21,45,000/- The change in an accounting policy is being made to Comply with the Revised Schedule VI and to disclose better presentation of the financial statements.

**(IV) IMPAIRMENT OF ASSETS**

Carrying amount of cash generating units / assets is reviewed for impairment, if events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. If any such indication exists, the recoverable amount is estimated as higher of its net selling price and value in use. An impairment loss is recognized in the Statement of Profit and Loss, whenever the carrying amount of an asset/cash generating unit exceeds its recoverable amount.

**(V) DEPRECIATION**

Depreciation on the assets other than Plant & Machinery is provided for at written down value method as per the rates prescribed under Schedule XIV of the Companies Act, 1956. Plant & Machinery is being depreciated at the rate 25% per annum on written down method. Freehold Land is not depreciated. Leasehold land is being written off over the lease period.

**(VI) REVENUE RECOGNITION**

Revenue is recognized when it can be reliably measured and when all significant risks and rewards/ownership are transferred to the customer. Sales are inclusive of sales during trial run, excise duty and net of sales tax/vat. Interest income is recognized on accrual basis in the income statement.

Expenditure is accounted for on accrual basis and provision is made for all known losses and liabilities.

**(VII) FOREIGN CURRENCY TRANSACTIONS**

Transactions denominated in foreign currencies are normally recorded at the exchange rates prevailing at the date of the transactions. Monetary items denominated in foreign currencies outstanding at the year-end are translated at the exchange rate applicable as on that date. Non monetary items are valued at the exchange rate prevailing on the date of transaction.

From accounting periods commencing on or after 7 December 2006, the company accounts for exchange differences arising on translation/settlement of foreign currency monetary items as follows:

- (i) Exchange differences relating to long-term monetary items, arising during the year, in so far as they relate to the acquisition of depreciable capital assets are added to/deducted from the cost of asset and depreciated over the remaining useful life of the asset.
- (ii) All other exchange differences are recognized as income or expenses in the Statement of Profit and Loss in the period in which they arise.

**(VIII) INVESTMENTS**

Investments are classified into current and long-term investments. Current investments except for current maturities of long term investments are stated at the lower of cost and quoted/ fair value. Long term investments are stated at cost less any provision for other than temporary diminution in value.

**(IX) INVENTORY VALUATION**

Inventories are valued at lower of cost or net realizable value except scrap which is valued at net realizable value. The cost is determined by using first-in-first-out (FIFO) method. Finished goods and work-in progress include costs of conversion and other costs incurred in bringing the inventories to their present location and condition.

Excise duty on closing stock of finished goods and scrap are accounted for on the basis of payments made in respect of goods cleared as also provision made for goods lying in the factory and included in the value of such stocks.

**(X) INCOME TAX**

Provision for current income tax is made after taking credit for allowances and exemptions. In case of matters under appeal, due to disallowance or otherwise, provision is made when the said liabilities are accepted by the Company.

Minimum Alternative Tax (MAT) credit is recognized as an asset only when and to the extent there is convincing evidence that the Company will pay income tax higher than that computed under MAT, during the period that MAT is permitted to be set off under the Income Tax Act, 1961 (specified period). In the year, in which the MAT credit becomes eligible to be recognized as an asset in accordance with the recommendations contained in the guidance note issued by the Institute of Chartered Accountants of India (ICAI), the said asset is created by way of a credit to the statement of Profit and Loss and shown as MAT credit entitlement. The Company reviews the same at each Balance Sheet date and writes down the carrying amount of MAT credit entitlement to the extent there is no longer convincing evidence to the effect that the Company will pay Income Tax higher than MAT during the specified period.

**(XI) BORROWING COST**

Borrowing cost includes interest, amortization of ancillary costs incurred in connection with the arrangement of borrowings and exchange differences arising from foreign currency borrowings to the extent they are regarded as an adjustment to interest cost.

Borrowing Cost that are attributable to the acquisition or construction of qualifying assets are capitalised as part of the cost of such assets. A qualifying asset is one that necessarily takes substantial period of time to get ready for its intended use. All other borrowing costs are expensed in the Statement of Profit and Loss in the period they occur.

**(XII) MODVAT / CENVAT / VAT**

Modvat/ Cenvat/ VAT claimed on capital assets is credited to assets / capital work in progress account. Modvat/ Cenvat/ VAT on purchase of raw materials and other materials are deducted from the cost of such materials.

**(XIII) CLAIMS**

Claims receivable are accounted for depending on the certainty of receipt and claims payable are accounted at the time of acceptance.

**(XIV) RETIREMENT/POST RETIREMENT BENEFITS**

(a) Short term employee benefits are recognized as an expense at the undiscounted amount in the year in which related service is rendered.

(b) The Company has defined contribution plan for post retirement benefits, namely Employees Provident Fund scheme administered through provident Fund Commissioner. The Company's contribution is charged to revenue every year.

(c) Leave Encashment is accounted for on accrual basis and charged to the statement of Profit and Loss in the year in which employee has rendered services.

(d) Provision for Gratuity has been made in the books of Accounts, as per the provisions of Payment of Gratuity Act, 1972 on the assumption that all the employees are entitled to gratuity at the end of the accounting period.

**(XV) PROVISIONS**

Show cause notices issued by various government authorities are not considered as obligation. When the demand notice are raised against such show cause notice and are disputed by the Company then these are classified as possible obligations.

Provisions involving substantial degree of estimation in measurement are recognised when there is a present obligation as a result of past events and it is probable that there will be an outflow of resources.

**(XVI) CONTINGENT LAIBILITIES & COMMITMENTS**

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non occurrence of one or more uncertain future events beyond the control of the company. Where the potential liabilities have a low probability of crystallizing or are very difficult to quantify reliably, these are treated as contingent liabilities. Such liabilities are disclosed in the notes but are not provided for in the financial statements, although there can be no assurance regarding the final outcome of the legal proceedings, the company does not expect them to have a materially adverse impact on the financial position or profitability.

**(XVII) DEFERRED TAX**

Deferred Tax reflects the impact of current year timing differences between taxable income and accounting income for the year and reversal of timing differences of earlier years. Deferred tax is measured based on the tax rates and the tax law enacted or substantively enacted at the balance sheet date. Deferred tax assets are recognised only to the extent that there is reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realised. In case of unabsorbed depreciation and carry forward of losses under tax laws, deferred tax assets are recognised only to the extent that there is virtual certainty support by convincing evidence that sufficient future taxable income will be available against which such deferred tax assets can be realized.

At each Balance Sheet date, the company reassesses unrecognized deferred tax assets. It recognised unrealized deferred tax assets to the extent it has become reasonably or virtually certain, as the case may be, that sufficient taxable income will be available against which the deferred tax can be realized.
